Applicable standards:

- Essential safety requirements provided by Directive 2006/42/EC;
- Electrical Equipment Electromagnetic Compatibility (EMC) Directive 2014/30/EU.

AVAILABLE OPTIONS

- Brake for up/down movement
- Pression booster
- Special painting
- Steel platform
- Lifting height limiter stop

- Main joint rotation block
- Middle joint rotation block
- Top joint brake
- Working area sensor on main and middle joint

WORKING ENVIRONMENT CONDITIONS

- Relative humidity rate: from 30% to 90% \pm 5%
- Working temperature 5 to 50 °C
- Working environment: the system must be located indoor away from outdoor elements

SAFETIES

(when assembled with tooling)

The system stops automatically when:

- A communication error is detected (fault inside the cables, fault inside an electronic board...);
- Electric power supply switches off;
- A fault inside the proportional electric valve is detected;
- A fault inside the proportional pneumatic valve is detected;
- The cylinder pressure is not congruent with required pressure;
- The STOP button is pressed

Other safeties:

- Load loss detection;
- The system generates warning (without stopping the balancer) in order to show "out of range" working situations:
- Maximum lifting load limitation by electronic control.
