- to transport loads up to **500 kg**;
- **pneumatic tractor wheels** for perfect traction on any terrain;
- operative autonomy for **8 working hours of continuous use**;
- **standard or customizable skips** upon request.

# Technical sheet

Model name	DUMPER-JET
Certification	CE
Load capacity	500 kg
Maximum speed	5,5 km/h
Batteries	AGM 130 Ah
Weight (without batteries)	82 kg
Length	1.421 mm
Width	785 mm
Height	1.019 mm
Steering diameter	2,40 m

## Performances on slopes

Unit:  
mm [inch]

# Ergonomic driving

The handlebars driving system of **DUMPER-JET** is designed to make the operator's use of the machine more ergonomic, guaranteeing the **right comfort for prolonged use** during the work shift. The control and safety tools are all within easy reach, and the LED display always shows the remaining battery charge and the direction of travel; the key is on the right side for quick and convenient ignition. The **structure** is made of **resistant materials** in case of accidental impacts.

# Guaranteed autonomy

DUMPER-JET is equipped as standard with two **130 Ah** batteries, which guarantee the machine an autonomy of **8 working hours with continuous use**.

The batteries are hermetic **AGM** and therefore **do not require maintenance**.

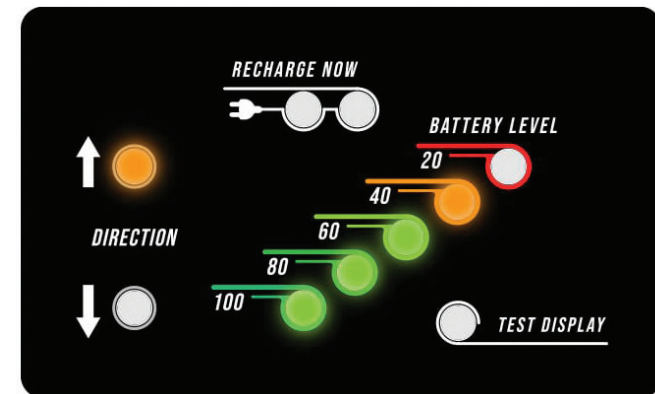

# LED control panel

The following information is indicated on the **control panel**:

- the **percentage of battery charge**, with an additional light that signals when the level is critical and reminds you to recharge as soon as possible;
- the **selected travel direction** (during reverse travel an intermittent acoustic signal will also be activated).

# Safety

Just like all Zallys vehicles, **DUMPER-JET** is equipped **as standard** with several systems to guarantee the **maximum safety** to the operator during use, helping to build a safe and productive work environment without risks of injuries or occupational diseases. The standard safety devices are:

- **Maintained action** controls;
- **Dead-man** lever;
- **Acoustic signal** while going backwards;
- **Hand guards** on both sides;
- **Electrobrake** always active in absence of electrical current;
- Connector for the **interruption of power supply**.

## Semi-automatic tipping

The **semi-automatic tipping of the tank** makes the unloading of materials practical and fast and **eliminates the physical effort of lifting**, preventing the risk of accidents and professional illnesses linked to fatigue and excessive and prolonged efforts. The **DUMPER-JET** allows you to work with maximum ergonomics both outdoors and indoors.

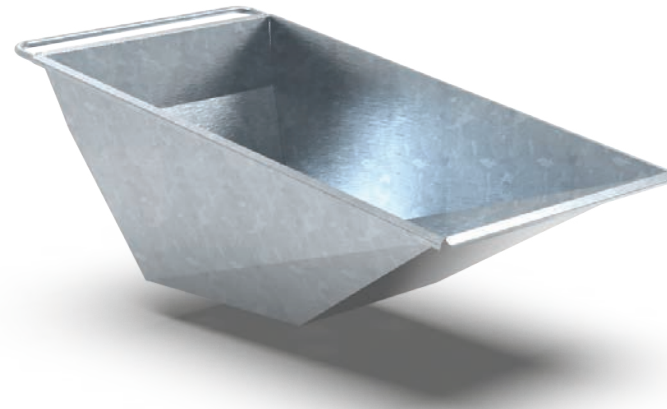

# Skips

**DUMPER-JET** has a wide range of **skips** of various sizes depending on the needs. All tanks are solid and resistant and treated with anti-corrosion coating.

Agriculture and Breeding 

Plant Nurseries 

# Alternative versions

**DUMPER-JET** is available in the standard version or in the **L** version, to transport bulkier loads.

## DUMPER JET

*Standard version*

**DUMPER-JET** is the ideal solution to eliminate the manual handling of aggregate materials. In the large tank, with anti-corrosion treatment, loads of up to **500 kg** can be transported.

## DUMPER JET L

*Longer frame*

**DUMPER-JET L** is a larger version of **DUMPER-JET**. With the same performance and technical characteristics, it is **200 mm longer** than the basic version, and this allows you to fit larger tanks.
