- to transport loads up to **500 kg**;
- **superelastic wheels** for indoor use;
- operative autonomy for **8 working hours**;
- **travel speed adjustment** with potentiometer.

Technical sheet

Model name	M15
Certification	CE
Load capacity	500 kg
Maximum speed	5,5 km/h
Batteries	AGM 45 Ah
Weight (without batteries)	78 kg
Length	1.232 mm
Width	690 mm
Height	1.075 mm
Steering diameter	1,18 m

Performances on slopes

Unit:
mm [inch]

Ergonomic driving

The driving system of **M15** is designed to make the operator's use of the machine more ergonomic, guaranteeing the **right comfort for prolonged use** during the work shift. The control and safety tools are all within easy reach, and the LED display always shows the remaining battery charge and the direction of travel; the key is on the right side for quick and convenient ignition. The **structure** is made of **resistant materials** in case of accidental impacts.

Dead-man lever

LED display

Buttons for selecting the travel direction

Emergency stop

Ignition key

Potentiometer for speed adjustment

Integrated anti-crush system

Guaranteed autonomy

M15 is equipped as standard with two **45 Ah** batteries, which guarantee the machine an autonomy of **8 working hours with continuous use**.

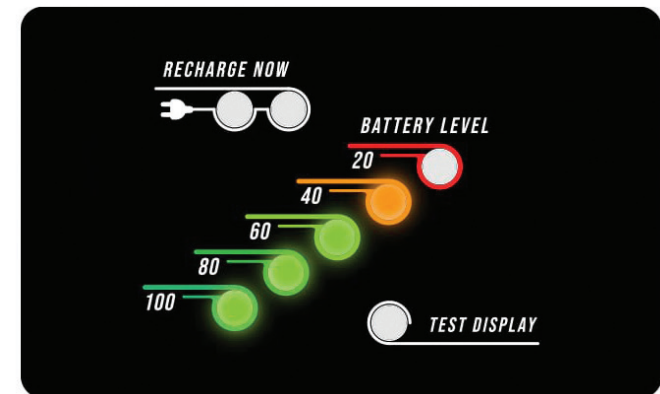

The batteries are hermetic **AGM** and therefore **do not require maintenance**.

LED control panel

The control panel of **M15** indicates the **percentage of remaining battery charge**, with an additional light that signals when the level is critical and reminds you to recharge as soon as possible.

Safety

Just like all Zallys vehicles, **M15** is equipped **as standard** with several systems to guarantee the **maximum safety** to the operator during use, helping to build a safe and productive work environment without risks of injuries or occupational diseases. The standard safety devices are:

- **Maintained action** controls;
- **Dead-man** lever;
- **Anti-crush system** integrated on the dashboard;
- Button for **emergency stop**;
- **Electrobrake** always active in absence of electrical current;
- Connector for the **interruption of power supply**.

Large loading surface

The loading surface of **M15** is made of **non-slip marine plywood**, spacious and safe for loading **up to 500 kg of material** and transporting it stably without the risk of it moving or falling. The surface measures 1040 x 640 mm.
